MANAGEMENT

One of our strength is our flat organization, which ensures a good line of communication and a very short responding time, which is important for us, as we, on most projects, is working with very short times of delivery.

In Nikon Industries we do not have “Upstairs and Downstairs” management, as our owners’ desk is placed in the Project Department, which is in close vicinity of the workshops where they also spend time every day. Hereby they are a part of “the gang” and always have a “finger on the pulse” with each project and ready to step in with help if needed.

QHSE DEPARTMENT

We have a very high focus on Quality, Health, Safety and Environment, and are constantly monitoring our working processes to ensure that all work is carried out according to the procedures in our QHSE management System, regardless of the work is carried out in our offices, workshops or at our customers premises.

Our Quality Management System is built up according to the way our working processes is carried out in the Offshore Industry and we are striving to keep it as simple and understandable as possible to ensure that it can, and will, be used by all our employees.

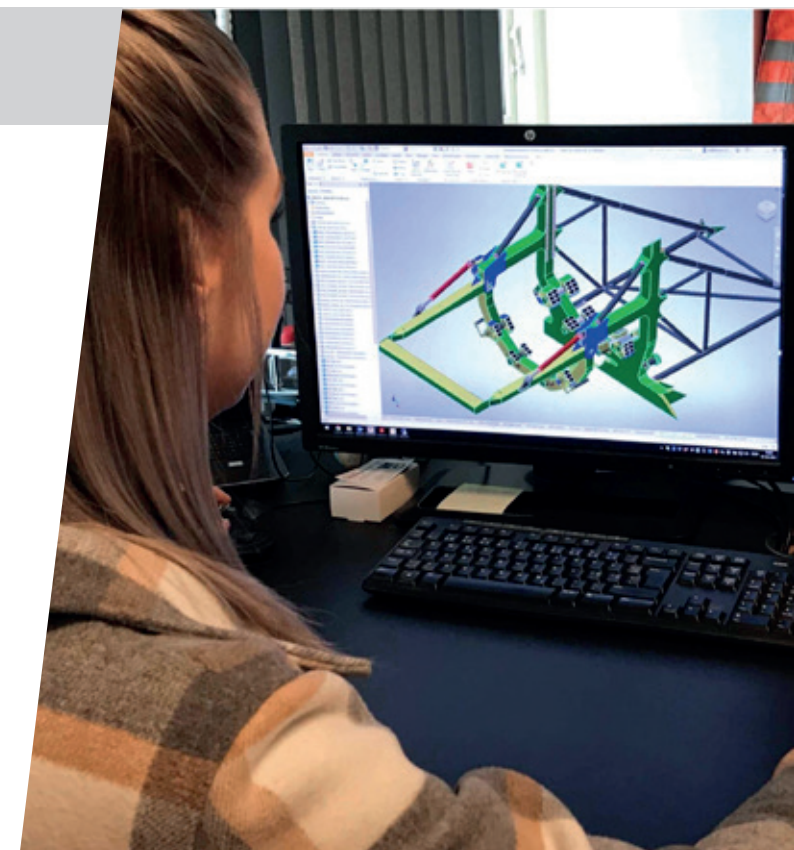

PROJECT DEPARTMENT

All projects, regardless of size and complexity, will be handled very carefully and professionally by our Project Managers.

All the received drawings will be carefully reviewed in order to ensure that everything fits together. Then each individual item, such as plates, profiles, and pipes, is taken out for cutting and machining. At the same time, each individual part will get a unique part number to ensure the traceability. If, for some reason, a complex detail is not shown on the drawings, or you as a customer has a special request, our highly skilled and experienced Project Managers will be able to step in and help with a detailed design in both 2D and 3D.

Besides their skills, experience and professionalism, our team of Project managers are very flexible according to working hours, in order to meet very short times of delivery.

PRODUCTION

We have 3 production facilities, 2 in Esbjerg and 1 in Frederikshavn.

Our workshops are managed by Workshop Mangers, running a permanent staff of fitters and certified welders of approximately 80 persons. Common to them all, Managers as well as fitters and welders, is that they are very highly skilled, flexible and have gained a wide range of experience throughout many years of employment in the Offshore industry.

During periods with high peak load, we have few well-known subcontractors where we can hire in extra staff, which means that we are familiar with the fitters and welders coming in, and they are familiar with us, our standards, requirements and QHSE procedures.

Sperlingvej 2
 DK-6700 Esbjerg

- Workshop 1250 m2
- Workshop lifting capacity: 32 ton + 10 ton
- Gate size W: 18 m. H: 11 m.
- Site area 7800m2
- Quayside distance 150 m.
- Water depth 10,5 m.

Trafikhavnskaj 1
 DK-6700 Esbjerg

- Workshop 1800 m2
- Workshop lifting capacity: 2x5t + 2x5t + 2x5t + 2x3,2t
- Gate size 3 pcs. W: 7m. H: 7 m.
- Site area 3500m2
- Quayside distance 25 m.
- Water depth 10,5 m.

Sandholm 55
 DK-9900 Frederikshavn

- Workshop 500 m2
- Workshop lifting capacity: 5t
- Gate size W: 4m. H: 4 m.
- Site area 3000m2
- Quayside distance 200 m.
- Water depth 10 m.

Surface treatment:

Over the years, the constructions we build in our workshops have become larger and larger, and gradually so large that it was difficult to transport them around the streets of Esbjerg. Therefore, we have established our own Surface treatment workshop for sandblasting, metallization, and painting work. It is placed in the immediate vicinity of the workshop on Sperlingvej.

Capacity:

Size: 350 m2
 Gate: W: 19 m. H: 8m.

Warehouse:

Another crucial department of Nicon Industries is our warehouse. Besides ingoing- and outgoing goods, they are responsible purchasing of all daily consumer goods such as working clothes, PPE, tools, welding wire, bolts etc.

Repairing and maintenance of wires, cables, and tools such as grinders, drilling machines, welding handles etc. is also carried out here.

On top of that they are responsible for packing and unpacking of project containers for external jobs carried out on different location in Esbjerg, other parts of Denmark and abroad.

FINANCE DEPARTMENT

In close cooperation with the project department, they carefully monitor all large and/or complex projects, that involves a certain amount of economy, very carefully, from start to delivery, to ensure that everything is “on track”.

Besides that, they are taking care of paying out wages for all employees, sending and paying invoices, and keep a very close eye on the overall economy together with our owners.

MANPOWER

If you, during peak loads or for other reasons, have a need for skilled manpower such as project managers, workshop managers, fitters, or certified welders, please contact Henrik or Jens via phone or e-mail.

EQUIPMENT RENTAL

We also rent out various types of equipment such as shackles, lifting slings, forklifts, cherry pickers, containers etc.

An equipment list can be seen on our web page at www.nicon-industries.com or you can contact Henrik or Jens via phone or e-mail.

CUSTOMER SATISFACTION

Dear Ladies and Gents,
 During the mobilization of Wind Osprey from Cadeler for Triton Knoll WTG, I was working with the Master, C/O, the Crew of Wind Osprey, Mob Manager, the crew of Nikon and the DEME Mob team during Night Shift.

Everything was handled very professional way, concerns regarding QHSE were taken serious and closed out immediately, if possible.

We were facing some problems, but they were solved in a very professional and calm way. All in all I can say that the mobilization was safe, in time and very well planned by all involved parties. Cadeler, Nikon and DEME Group were working together as one team and succeeded together. If we continue in that way, renewable energies will have a great future and all of us, as a team will be part of solving one of the greatest threats to mankind. I would be happy to join here again in Esbjerg for another Mob with this team.

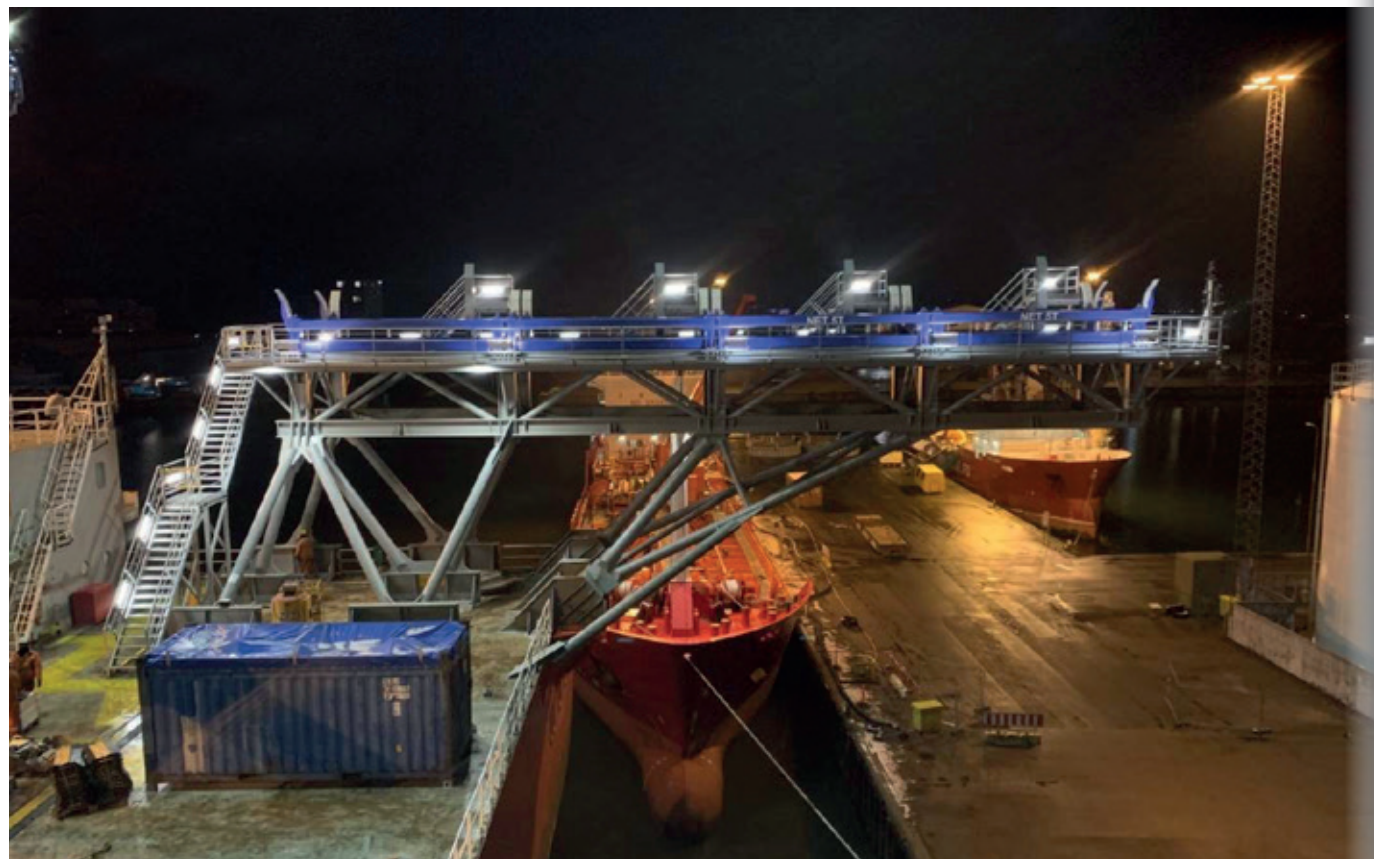

Thank you very much and see you some day in our “Small” Offshore World.”

Best regards / Med venlig hilsen / Met vriendelijke groeten / Mit freundlichen Grüßen
